CAPABILITY STATEMENT

Red One Medical Devices LLC (Red One) is a Service-Disabled Veteran Owned Small Business (SDVOSB) supporting America's warfighters, veterans, and their families. We focus our efforts on accelerating the transfer of medical technology and acting as a medical innovation hub for the Department of Defense Military Health System (MHS) and the Department of Veterans Affairs (VA). Red One works with large companies as well as innovative startups to provide the MHS and the VA with groundbreaking medical devices, pharmaceuticals, biologics, and other products that improve patient care.

Our Red One team works diligently with government, distributors, and manufacturers to source medical technologies and products for military treatment facilities, VAMC's, pre-hospital and austere operational environments.
